Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims <u>1-15</u>	YES
	Claims _____	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-15</u>	NO
Industrial Applicability (IA)	Claims <u>1-15</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-15 lack an inventive step under PCT Article 33(3) as being obvious over CUMBERS '876.

Cumbers teaches the invention substantially as claimed. Cumbers teaches photographing the player each time the player plays the game. Cumbers teaches storing data representing play parameters for each game played. By law slot machines are required to store size of wager, type of wager, outcome of the game, amount won by the player, and any identification data gathered by the machine (i.e., the player's picture). This must be stored for each game in order for the game to meet the legal requirements in jurisdictions within the United States. A casino is required by law to be able to recreate each and every game played on a slot machine for a certain period of time. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Cumbers to provide a complete historical log of game play to comply with the law.

Claims

1. A player identification system, comprising:
 - 5 a betting terminal operable by a player to play at least one game thereon and to place a wager on an outcome of any turn of the game, the outcome of each turn the game being determined, at least in part, by chance;
 - 10 a camera associated with the betting terminal, the camera being arranged to capture an image of the player operating the betting terminal at least once during each turn of the at least one game; and
 - 15 a logging facility capable of logging, for each turn of the at least one game, logging data representative of a size and type of the wager placed by the player on the turn of the game, the corresponding outcome of that turn of the game, and the image of the player captured by the camera during the turn of the game.
2. A player identification system as claimed in claim 1 in which the betting terminal is operable by the player to play any one of a number of different selectable games.
- 20 3. A player identification system as claimed in claim 2 in which the camera is arranged to capture the image of the player operating the betting terminal at least once during each turn of any game being played by the player.
- 25 4. A player identification system as claimed in claim 3 in which the logging data is representative, also, of the particular game being played by the player.
- 30 5. A player identification system as claimed any one of the preceding claims in which the logging facility includes a non-volatile storage memory for storing the logging data thereon.

- 5
6. A player identification system as claimed in claim 5 in which the storage memory is configured as a rolling buffer capable of storing logging data relating to a number of the most recent turns of any games played by the player.
7. A player identification system as claimed in claim 1 that includes an enquiry facility operable to display any logging data contained in the storage memory.
- 10
8. A player identification system as claimed in claim 7 that includes a display monitor capable of displaying any image of the player contained in the storage memory.
- 15
9. A method for identifying players at a betting terminal, comprising the steps of:
- enabling a player to operate a betting terminal to play at least one game thereon and to place a wager on an outcome of any turn of the game, the outcome of each turn the game being determined, at least in part, by chance;
- 20
- capturing, at least once during each turn of the at least one game, a camera image of the player operating the betting terminal; and logging, for each turn of the at least one game, logging data representative of a size and type of the wager placed by the player on the turn of the game, the corresponding outcome of that turn of the game, and the image of the player captured by the camera during the
- 25
- turn of the game.
10. A method as claimed in claim 9 that includes the step of enabling the player to operate the betting terminal to play any one of a number of
- 30
- different selectable games.
11. A method as claimed in claim 10 that includes a step of capturing the image of the player operating the betting terminal at least once during each turn of any game being played by the player.

12. A method as claimed in claim 11 that includes a step of logging additional data representative of the particular game being played by the player.

5

13. A method as claimed in any one of claims 9 to 12 that includes a step of storing the logging data on a non-volatile storage memory.

10

14. A method as claimed in claim 9 that includes a step of configuring the storage memory as a rolling buffer capable of storing logging data relating to a number of the most recent turns of any games played by the player.

15

15. A method as claimed in claim 14 that includes a step of displaying any logging data contained in the storage memory on an enquiry facility having a display monitor.
